Special				
Tenoner, Single End	Italian Tall Spindle	1998 Italian Crated	With manual, additional tooling	Inquire \$3,500

These types of single end tenoners have 2" diameter spindles, loaded with tooling - enough to do several complete pairs of cope/stick. The spindle is located numerically in relation to the powered horizontally traveling table. This machine was bought at a "price too good to be true". This can only be shown by appointment and is heavily crated. Located on NE side of Indianapolis.

Sanding Sheets No Sale	Sanding Belts, sleeves, drums, etc.	?	Includes diamond stones (2 of),	All other abrasives	

All equipment is sold as is. Fully operational when taken out of service in October 2024.

FOB Westfield, no crating.

Missing, presumed converted: Oneida dust collection system - fan, cyclone, plenum, filters.
Phase Converter - for Powermatic 2-A tenoner, SCMI Shaper and Maka DB7. Miscellaneous hand tools, carving tools.

All tools and equipment were in good working condition when Acorn was sold. Almost all the equipment was used every day, and kept in good condition. Once the sale was defaulted, prolonged refusal to return asserts made for less than ideal storage conditions. Surface rust is apparent on some pieces, though nothing that would hinder operation or function once cleaned up.

The Accurate Technology Digital Read Outs appear to have been yanked around and disconnected. I will make the best effort I can to insure all the parts are part of the sale.
I cannot find the extra sets of planer and joiner knives (2 sets @ 3pcs x 18" and 2 sets @ 3 pcs x 8", all HSS). If located, they will be given to the buyer.

Nearly all the larger tools have had bearing replacements to key and ancillary utilities.
